REASONS FOR ALLOWANCE

Allowable Subject Matter

- 1. Claims 1-15 are allowed.
- 2. The following is an examiner's statement of reasons for allowance:

RE claim 1, the prior art taken alone or in combination fails to teach the limitations in accordance with the embodiment of the present invention. The prior art of record, and in particular Enarson et al (USPN 6,078,455), fails to teach or suggest a magnetic disk drive comprising a temperature sensor for measuring surrounding temperature; wherein one of said first and second storage areas are selected data based on surrounding temperature in recording data.

RE claim 10, the prior art taken alone or in combination fails to teach the limitations in accordance with the embodiment of the present invention. The prior art of record, and in particular Enarson et al (USPN 6,078,455), fails to teach or suggest a method of controlling a magnetic disk drive comprising recording data in first storage area of a magnetic disk at low temperature, and recording data in second storage area of the magnetic disk at high temperature.

Re claim 13, the prior art taken alone or in combination fails to teach the limitations in accordance with the embodiment of the present invention. The prior art of record, and in particular Enarson et al (USPN 6,078,455), fails to teach or suggest a method of controlling a magnetic disk drive comprising: recording data in first storage area of a magnetic disk at low temperature; and recording said data stored in said first storage area in second storage area of the magnetic disk if surrounding temperature is high.

Art Unit: 2651

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

- 4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following documents are cited to further show the state of the art with respect to controlling magnetic disk drives.
- a) Munehisa (JP 2003-141703): Discloses a dummy write when a change in temperature occurs.
- b) Masaru (JP 2004-118993): Discloses improving reliability in a disk drive under high temperatures.
 - c) Akira et al (JP 61-156578): Discloses head position accuracy by detecting temperature.
- Any inquiry concerning this communication or earlier communications from the examiner should be directed to Natalia Figueroa whose telephone number is (571) 272-7554.

 The examiner can normally be reached on Monday Thursday 8:30-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David R. Hudspeth can be reached on (571) 272-7843. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
